

MYP Programme

The Secondary programme stage from 11 to 16 years combines the Spanish curriculum with the IB Middle Years Programme (MYP), so the focus is not only on acquiring knowledge but actively developing students' **skills and strategies that will enable them to solve problems and develop projects in an international and global context full of challenges and opportunities.**

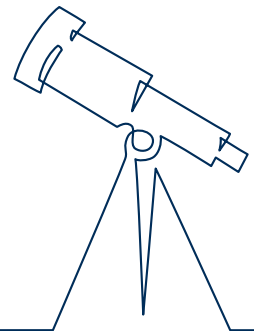

Secondary at Yago not only embeds a love of learning that will last a lifetime but thanks to our dedicated team of educators, also meets the other needs of students at a key stage in their lives: adolescence, a period which is a particularly critical phase of personal and emotional as well as intellectual development, and therefore reinforces their education in values from three dimensions: civic, ethical and solidarity.

Secondary is a stage where our **students grow and achieve through academic successes, charitable and volunteering experiences, technological events, trips and competitions and express and challenge themselves in sports and the arts.** The curriculum includes a wide range of subjects, taught either in English or Spanish, including two modern languages, and technology,

At the end of Secondary, students reach an advanced level of linguistic communication skills, many of them finishing Secondary with official qualifications CEFR C1 in English or Spanish and B2 in Chinese and French.

Secondary at Yago

Yago School is part of a global community of schools committed to educating caring, knowledgeable and informed young people who will be ready to face their future with success and contribute to creating a better world.
